

MARKET REPORT

April 3rd, 2026

Produce markets remain active as weather impacts, seasonality, and regional transitions continue affecting supply consistency across key commodities.

ASPARAGUS

Mexican yields remain low from heat stress; Peruvian production starting, with supply expected to increase post-Easter.

GREEN BEANS

Florida production continues improving weekly, helping stabilize availability following previous freeze-related supply shortages.

BLUEBERRIES

Peruvian production limited seasonally; Florida harvest beginning while Georgia supply expected to start mid-April.

BASIL

Weather issues across regions continue reducing basil supply and quality as demand significantly exceeds availability.

SNOW PEAS

Guatemalan snow peas and sugar snaps maintain good supply levels with stable availability across markets.

CARROTS

Guatemalan baby rainbow and bi-color remain limited, while baby orange supply shows slight improvement recently.
