

# MARKET REPORT

May 8th, 2026

Produce markets are showing gradual seasonal improvement overall, though weather and regional transitions continue impacting select commodities.

## ASPARAGUS

Mexican production remains light while Peruvian seasonal declines and emerging domestic regions keep markets active.

## GREEN BEANS

Florida-to-Georgia transition causing temporary supply gap, though availability expected improving by next week.

## BLUEBERRIES

Georgia production remains strong as Peruvian and Florida seasons conclude due to normal seasonal transitions.

## BASIL

Weather challenges continue reducing basil quality and supply despite stable imported chervil availability.

## SNOW PEAS

Guatemalan snow peas and sugar snaps maintain stable supplies with consistent overall market availability.

## CARROTS

Guatemalan baby orange, rainbow, and bi-color carrot supplies continue steadily improving across markets.
